

Battery Powered BST300 Crimping Tool

TorqTek BST300 Battery Powered Hydraulic Crimping Tool

Introducing the TorqTek BST300, the next evolution in battery powered crimping for lugs ranging from 10.0 to 300.0mm². This redesigned series features a slim, ergonomic in-line grip and lightweight build, specifically engineered for overhead work and confined spaces. The upgraded 350° swivel barrel ensures effortless access to complex terminal connections, while the 60kN two-stage hydraulic system delivers a rapid crimp cycle of just 2.5 to 4 seconds.

The BST300 integrates an advanced OLED Display for real-time tracking of battery levels and maintenance needs, alongside a dual-colour LED indicator for instant cycle confirmation. Controlled via a single trigger with an anti-slip grip, the tool includes a manual retract function and built-in LED work light for total precision. Combining an updated internal structure with extended service life, the BST300 represents the pinnacle of efficiency and durability for professional crimping applications.

- Ergonomic In-Line Precision
- Intelligent Performance Monitoring

Crimping Range: 10.0 to 300.0mm²
Crimping Pressure: 60KN
Stroke: 17mm
Crimp Type: Hexagon Crimp
Weight: 3.5Kgs Including Battery

OLED Display: Yes
Battery Capacity: 18V / 2.0Ah
Charging Time: 40mins
Charging Voltage: AC 100V-240V; 50-60Hz
Cycle Time: 2-5s (dependent on die size)

TORQTEK

Code	Description	Tool Dimensions (mm)	Crimping Capacity (mm ²)
BST300	Battery Powered Light Weight In-Line Hexagon Crimping Tool	420 x 129 x 76	10.0 - 300

Kit Includes

- 1x Battery Operated Tool
- 2x 18V Li-Ion 2.0Ah Batteries
- 1x Charger
- 1x Replacement Cylinder & Safety Valve Seal Set
- 1x Case
- Crimp Dies 10, 16, 25, 35, 50, 70, 95, 120, 150, 185, 240, 300mm²
